PROFILE

As a seasoned Full Stack Developer with extensive experience in dynamic web applications, I specialize in the MERN stack technology. My expertise includes building responsive interfaces, real-time services, and integrating diverse APIs to enhance functionality. Eager to embrace new technologies and frameworks, I continually adapt to the latest advancements to stay at the forefront of the tech industry.

PROJECTS

MarketMarvel

- Developed an Ecommerce project using the **MERN** stack and **Redux Toolkit**, focusing on building a comprehensive ecommerce platform.
- Utilized **MongoDB** for effective data management and developed server-side logic with **Express.js** and **Node.js** to enhance scalability.
- Improved the user interface using **React.js** and optimized application state management with **Redux Toolkit**.
- Integrated **PayPal API** to enable secure payment transactions.

SnapLeaf

- Developed SnapLeaf, a dynamic project utilizing **React** for front-end development, creating interactive and responsive web applications.
- Integrated **Firebase** for backend operations including database interactions, authentication, and hosting.
- Implemented **Google Maps API** to enrich the application with location-based functionalities.
- Integrated the **Plant ID API** to analyze user-submitted photos for plant identification, providing detailed plant information in response.
- Designed and implemented user interfaces using **Material-UI** and **TailwindCSS**, enhancing aesthetic appeal and usability.
- Leveraged **TailwindCSS** for custom, responsive design, significantly improving the visual coherence and mobile responsiveness.

Alo Tony

- Developed Alo Tony, a delivery service website using **React**, enabling dynamic and responsive interactions for viewing restaurant menus and contacting delivery personnel.
- Designed intuitive and appealing user interfaces with **Material-UI** and **TailwindCSS**, focusing on user experience and visual consistency.
